

AADARSH RAJ

SOFTWARE ENGINEER I

+91-7717777192 | aadarshraj125@outlook.com | [linkedin](#) | Bengaluru, India

PROFESSIONAL SUMMARY

Experienced Android Framework Developer working on the application and framework layers of AOSP for BSP systems. Proficient in Java, Python, MySQL, and a broad range of development tools and technologies. Focused on optimizing system performance, improving reliability, and ensuring seamless system integration through efficient development and problem-solving.

WORK EXPERIENCE

Software Engineer I

Jun 2024 - Present

Zebra Technologies, Bengaluru, India

- Enhance and maintain the framework and application layers for the BSP, ensuring seamless integration and optimal performance.
- Address and resolve critical issues, significantly improving system stability and user experience.
- Regularly integrate security patches and manage branch migrations to keep software releases up to date and ensure smooth transitions between versions.
- Along with, handling an independent automation project, helping to increase the security score of release builds.
- Also, developed a Gen-AI based log-analyzing tool that assists developers by identifying issues, providing insights, and recommending actions to accelerate troubleshooting and resolution.

Associate Software Engineer

Aug 2023 - May 2024

Tech Mahindra, Bengaluru India

- Working for one of our clients, Zebra Technologies, Bengaluru.
- Leading a Full-Stack Web App built with Django, MongoDB Cloud, React, and Android SDK Tools.
- Incubated during internship, now propelling it forward in a full-time capacity.

Software Intern

Jan 2023 - June 2024

Zebra Technologies, Bengaluru, India

- Developed a full-stack application for Jenkins users leveraging Django, MongoDB Cloud Atlas, and React.
- Real-time data streaming in React UI using Web-Realm feature, enabling users to monitor and control processes.
- Designed a comprehensive pipeline that involved multiple processes and structured storage of processed data of Builds, enhancing workflow efficiency.

PROJECTS

AgriTrace : Blockchain-based Web Application

- A decentralized supply chain system using blockchain (Ganache, Truffle, Solidity) and web frameworks (React, Web3.js, Node.js, Express, Django). Enhanced transparency, reduced fraud, improved efficiency, and empowered farmers with machine learning-based price prediction.

EDUCATION

RV Institute of Technology and Management

Bengaluru, India

Bachelor of Engineering in Information Science & Engineering | CGPA: 8.23 / 10

Aug 2019 - June 2023

SKILLS

Java, Python, MySQL, Android Framework, Shell Scripts, BSP, Django, Rest APIs, MongoDB Cloud, PyMongo, UiPath, WordPress, Microsoft Power BI

PUBLICATIONS

AgriTrace: Blockchain-based Agricultural Supply Chain with Price Prediction

July 2023
